

Head Quality Lab Speak

It's indeed felt overwhelming connecting via "Nav Urja." Recently Company have completed major overhauling of Unit-2 as well as company also touched the 10th year mark of its operations on 16th October, I extend my heartfelt congratulations and best wishes to the entire members of APNRL family who were associated with it.

APNRL have faced many challenges and took on business hinders in current scenario but company cope up every challenge with dedicated and determined spirit which shows that we work here as family.

In terms of quality I would say, the costs of generating electricity in a coal-fired power plant depend not only on the delivered cost of coal but also on how coal quality affects plant performance. Utilities need to account for both these factors to decide which coals provide the most power at the lowest cost.

My association with APNRL is from year 2020. Since then with my personal experience, I found, our plant is working fine and all employees contributing like a family here. I must very much appreciate your continued patience, grace, and flexibility as we forge the road ahead together. Last but not the least I would like to sum up with the quote "Do what you can, with what you have, where you are."

Thank you & all the very best!
